

As we reflect back on the events of the past year, we are overwhelmed by God's extravagant blessings! One year ago we left Illinois and moved to Idaho, where God has given us the privilege of being part of the Learning Technologies team of Mission Aviation Fellowship. It has been a joy to partner with you in this ministry.

The digital library system developed this year was a particularly challenging project. Many long hours were spent designing the project in such a way that it can be used in multiple capacities around the world. Benefiting from this project first are ministry workers in Southeast Asia. With this digital library system, believers are able to easily access native-language Christian materials.

The most anticipated blessing to the ministry of Mission Aviation Fellowship this year was the arrival of the Kodiak airplane. The Kodiak was designed specifically to meet the unique needs of missionary aviation. Probably the most significant benefit of the Kodiak is that instead of needing costly avgas, it runs on readily available jet fuel.

Our first Quest Kodiak, turboprop aircraft, will help relieve our dependence on scarce aviation gasoline.

The Kodiak cockpit features the latest satellite navigation in its "all glass" instrument panel.

We cannot wait to see what God is going to do with these new ministry tools. We are sure that it will be more than we could ever ask or imagine.

Church-based Mobile Bible Schools

All too often I see Bible study as another thing on my “To Do” list. Listen to these accounts of believers who are truly thankful for the gift of Bible study God has given them through the ministry of Learning Technologies.

Tony Okullu, in Uganda, calls this the “Church-based Mobile Bible School.” MAF-LT provides a 5 gigabyte harddrive of Christian materials, many of which are audio files. Tony downloads a teaching series on the mp3 players and sends them out via a network of Christian coordinators who share them with pastors and Christian leaders in the villages.

Pastors from Lira, Uganda meet to listen to teachings on mp3 players.

Bramuel ministering in an African village

"In the last 3 years, MAF-LT has helped our ministries in Africa, too . . . empower, equip and release nationals for the work of ministry amongst their own people groups and within their cultures . . . In Kenya, Uganda, Zambia, Liberia, Nigeria, Ghana, Togo, and Ethiopia, we have stationed hard drives with digital resources carrying training material for leaders and the laity in audio, video and book formats. These are loaded onto smaller mp3 players that are checked in and out of the libraries (resource stations) by the respective users. As these leaders grow in the Word, so do their congregations." (Bramuel Musya, Africa Director of The God's Story Project)

Prayer Points

- Thank God for His many blessings, especially the opportunity to study His Word.
- Please pray for our time in Illinois, from Dec 17-Jan 11. Pray for time with family and friends as we share ministry updates. Pray for Brad as he recruits for MAF at the Urbana Conference in St Louis, Dec 27-31.
- Please continue to pray for the current project Brad is working on to deliver teaching via cell phones.
