MAF Learning Technologies

## Snapshots

Below are a few snapshots of national leaders who have been equipped through the Learning Technologies division of Mission Aviation Fellowship. God has allowed us the privilege of multiplying the effectiveness of their ministries by providing them with technology and training.

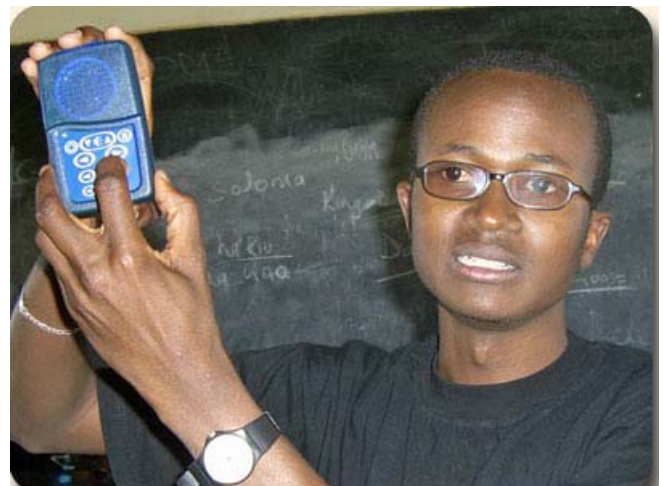

Michael, in Zambia, Africa, reports, "These training programs are helping our pastors very well. Our digital library has 320 regular ministers coming to use the teachings."

New believers are baptized in a remote area of India, by a pastor who receives Bible training via MAF Learning Technologies.

Doctors and nurses in North Central Asia have been trained through computers using distance education. This allows them to acquire new medical skills and knowledge while continuing their medical practices in the small villages that dot this region.

Bramuel Musya, Africa Director of the God's Story Project, demos a pre-programmed, solar powered audio player which provides the opportunity to hear the story of God's love in local languages.

## Anticipating God's Provision

As of June 1st, the twelve-month average of all gifts received towards our ministry with Mission Aviation Fellowship fell to a critical level of 72%. We are confident that God has called us to this ministry at this time. We also have confidence in His Word, in Philippians 4:19 that, *My God will meet all your needs according to His glorious riches in Christ Jesus.* During late July and August we will be sharing our ministry updates with supporters and extending invitations to new churches and individuals to partner with our ministry. We are asking everyone to please pray for this time.

Please pray that God will be glorified as we share the many ways He is using the LT team to encourage and train future leaders, church pastors, and new believers in their own environments. Brad is excited to be creating computer programs to digitize Bible translation, commentaries, training lessons.... all the "normal" books found in a believer's library, yet not available to these remote people-groups. How exciting to get CDs or even thumb drives into their hands, so they can connect to a computer and study. We take this so for granted, yet in other parts of the world it is a rare privilege.

We are humbled by the doors that only God could open. And blessed by the opportunity to be a part of the ministry of LT, to come alongside people who are hungry for more of His Word. As we thank the Lord for our "gifting" to share with others, we also look to Him to build our ministry team. Please pray about partnering with our ministry. Perhaps God will lead you to give a monthly gift, or yearly. Or, share our need with others who want to see modern computer technology used for God's glory, God's way. Please, pray with us!

*I thank my God every time I remember you.*

*In all my prayers for all of you, I always pray with joy because of your partnership in the gospel from the first day until now...*

*Philippians 1:3*

With much appreciation for you,

*Brad and Susan Rhoads*
